

TECNOTask

YOUR MECHANICAL SOLUTION

BRIEF SUMMARY

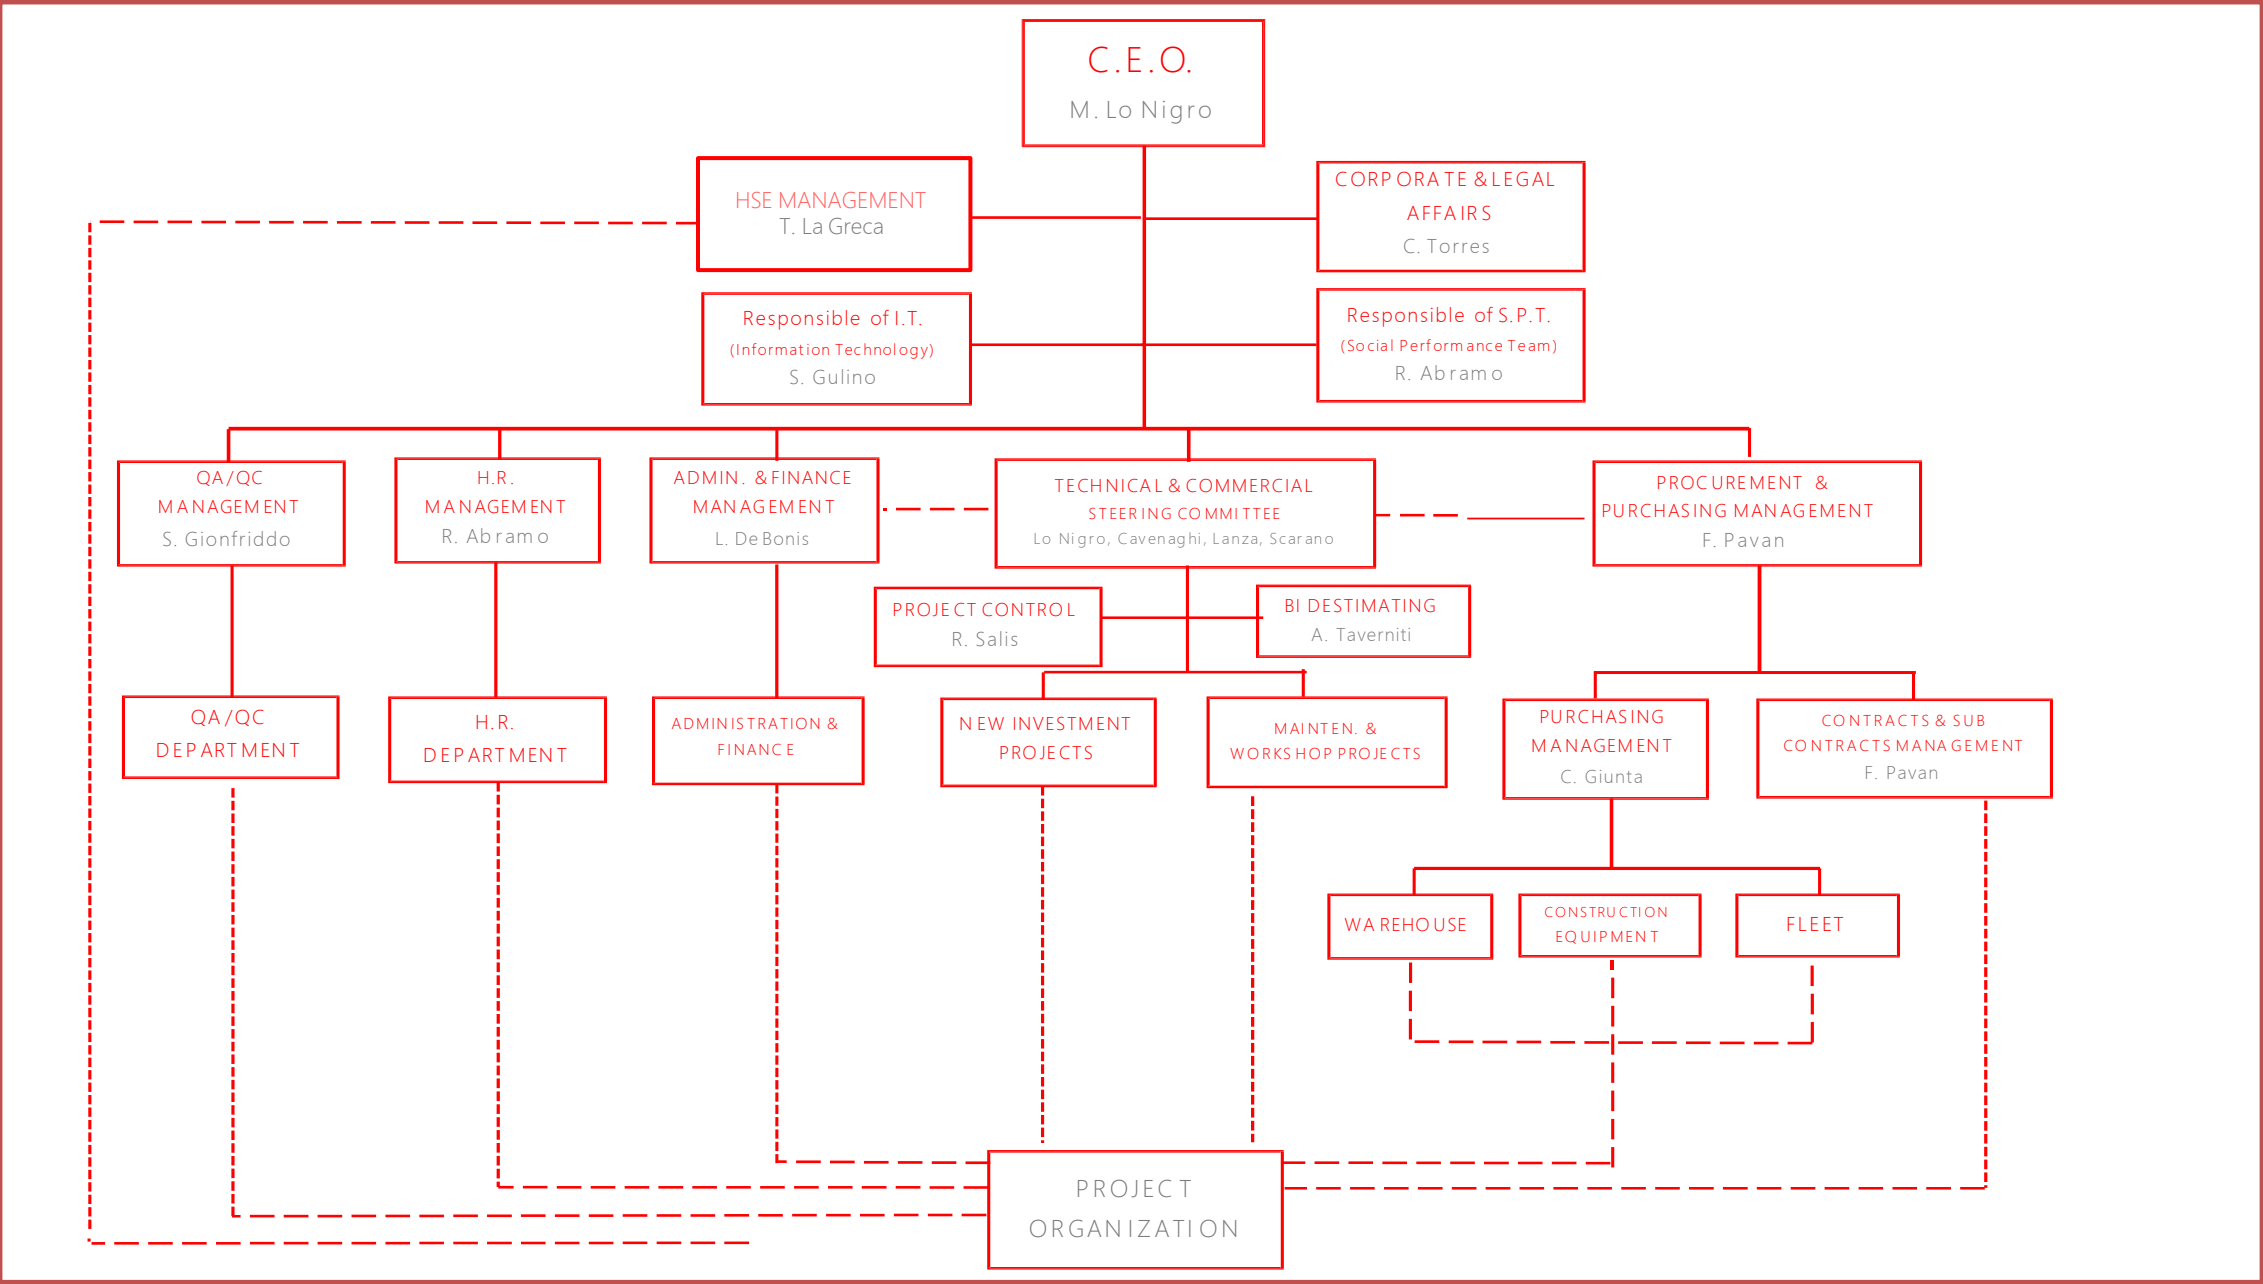

TECNOTask is a private Italian Company established at the end of 2011 by a group of professionals with a solid experience records, specialized in “Project & Construction Management”.

In 2015, TECNOTask started to operate as “Mechanical Contractor”, with direct manpower, equipment and tools granting high standards in terms of safety, quality and respect of project time schedule.

TECNOTask today runs projects in the fields of Oil and Gas, Chemical, Petrochemical, Pharmaceutical and Power aimed to always meet the satisfaction of all Project Stakeholders.

COMPANY ORGANIZATION CHART

Our mission:

- ❑ to be one of the major reliable mechanical contractor player
- ❑ continuously improvement

❑to be one of the major reliable mechanical contractor player

-

☐ **zero risks and zero accidents**

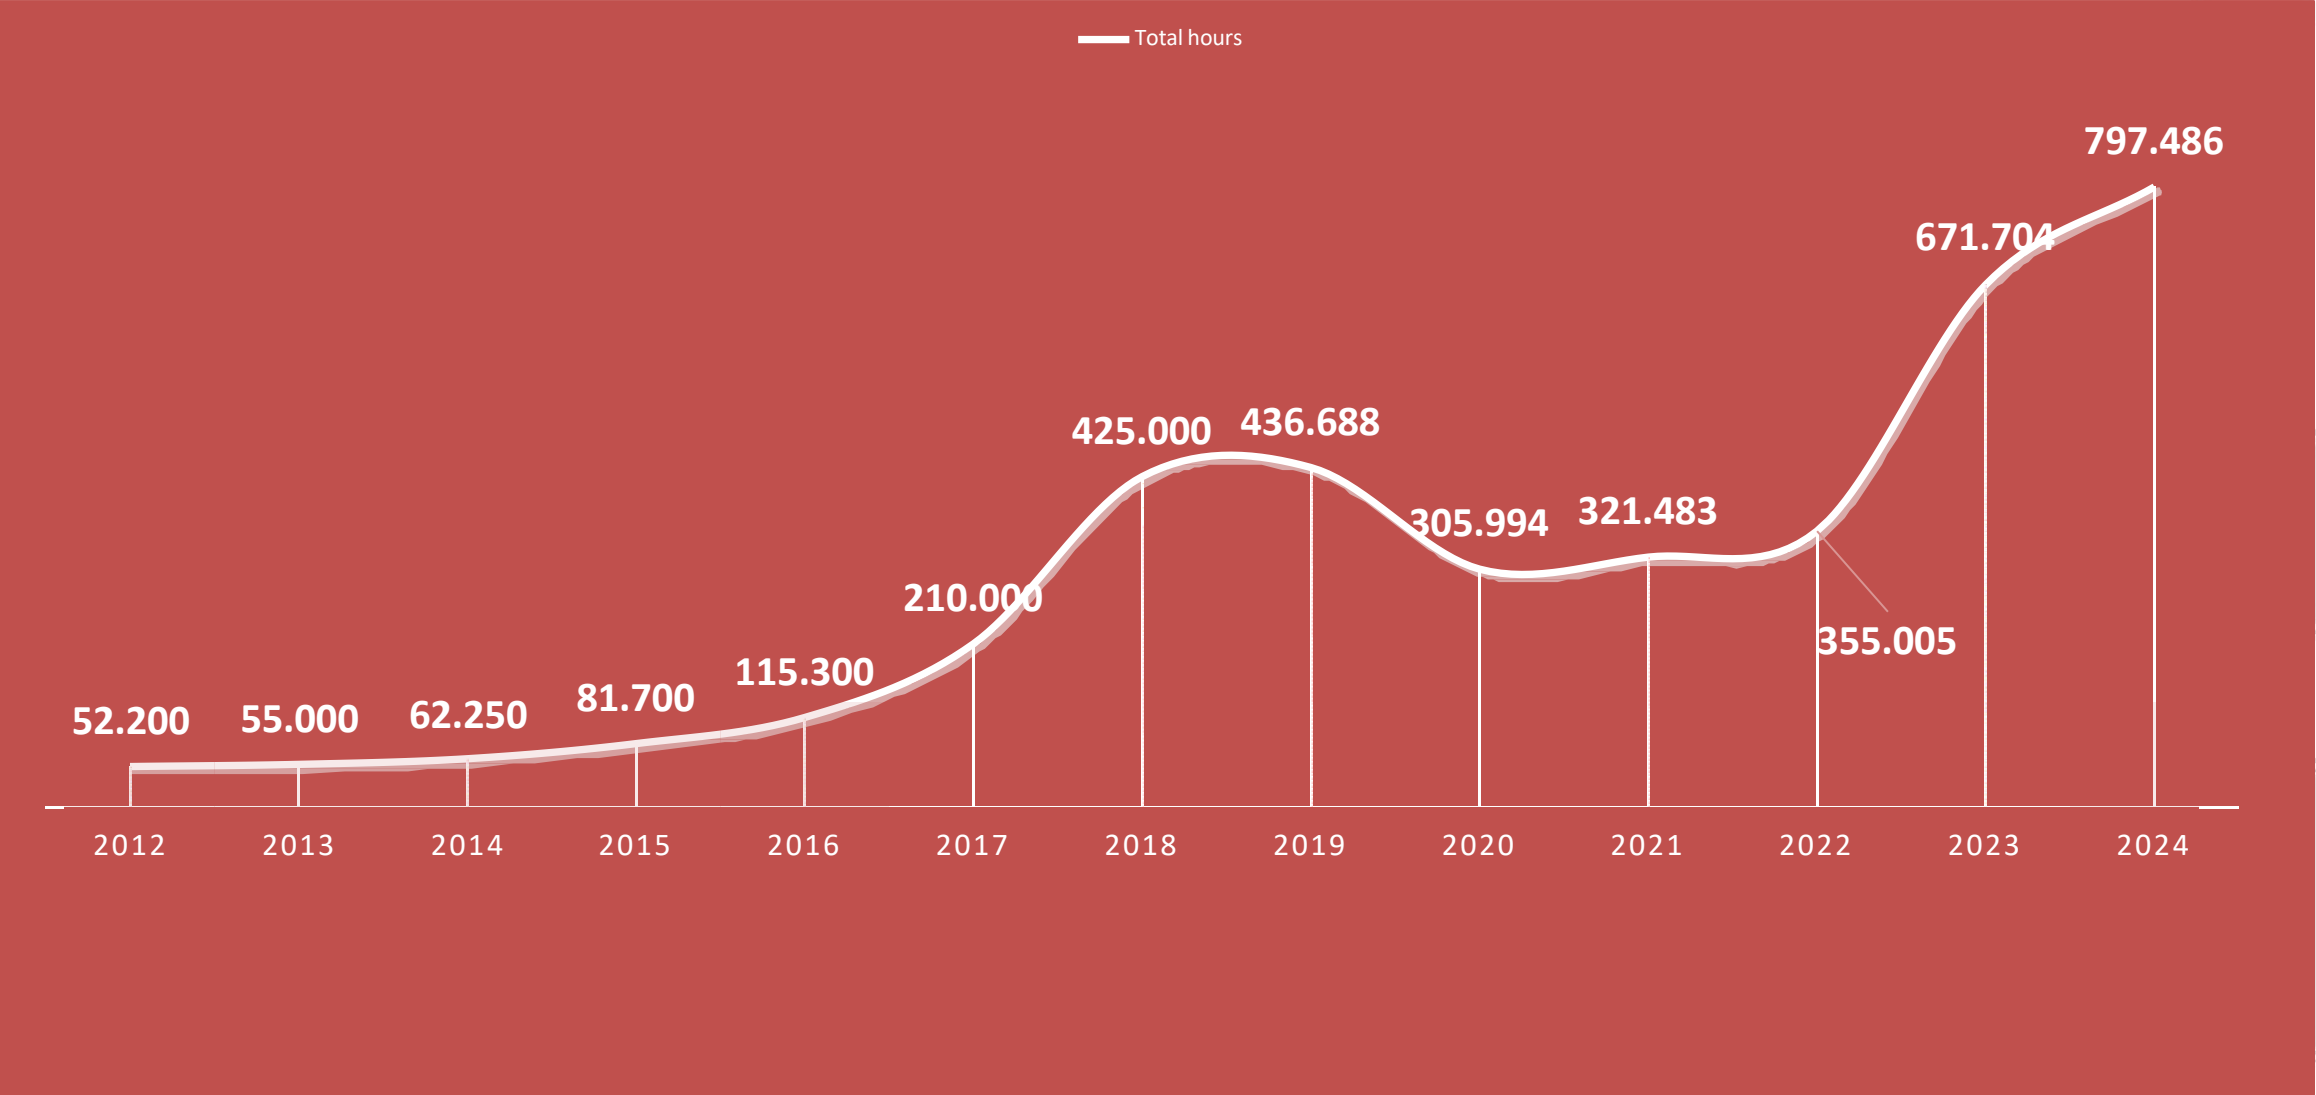

- [illegible]

☐ we work hard every day to success your project

-

TREND OF MANHOURS SPENT IN THE YEARS

COMPANY HSE **RULES**

THE GOAL: our company is strongly concentrated to keep our ZERO accidents.

in order to continue improve our HSE policy, we put in place a very efficient method of daily monitoring of all our projects by compiling a general HSE topics check list.

the results of this monitoring put in evidence where criticalities need to be focalized and dedicated actions take place to continue improve company HSE performances.

yearly Tool Box program is studied by HSE Department and shared with Company Management.

internal and external independent entities keep all our people professionally trained with all necessary Certificates.

HSE KEY PERFORMANCE INDEXES

Frequency Rate - 2012 -2023

$$FR = \frac{nr\ off\ injuries \times 100^6}{manh\ hours\ worked}$$

Severity Rate - 2012 -2023

$$SR = \frac{nr\ off\ lost\ days\ due\ to\ injuries \times 100^8}{manh\ hours\ worked}$$

Durata media infortuni - 2012 -2023

$$DDMM = \frac{nr\ off\ lost\ days\ due\ to\ injuries \times 100^8}{nr\ injuries}$$

BILTEN RAFINERIJE NAFTE RIJEKA, br. 2

Biramo najbolje izvođače

Radovi na remontu su u punom jeku, a mi imamo novog pobjednika tjedna!

U tjednu od 19. do 26. veljače 2019. najbolji timovi, koji su osvojili odlazak na zajedničko kuglanje, su:

KT, TECNOTASK i MONTING-kolona zbog izuzetne kooperativnosti i susretljivosti na dva velika projekta „Rekonstrukcija peći“ i „Zamjena kolone“ na postrojenju CDU

Rocco Borgese, TECNOTASK: „Ideja mi se jako sviđa! Ovo je odličan teambuilding za ekipe koje moraju na istom projektu blisko surađivati, kao u ovom slučaju mi s kolegama.“

Čestitamo!

Više informacija o kriterijima ocjenjivanja, načinu na koji se dodjeljuju ocjene i nagradama možete pronaći na letku koji se nalazi u restoranima u rafineriji i kod voditelja projekata.

Pozivamo vas da se uključite u natjecanje te da vodite računa o sigurnosnim mjerama i propisima kako bi ostatak remonta prošao sa što manjim brojem ozljeda!

WHAT WE DO **TODAY**

DETAILED ENGINEERING & PROCUREMENT

- piping isometrics spooling and cutting list preparation
- weld history sheet & material traceability
- as built and final dossiers
- procurement of project materials

FABRICATION & INSTALLATION/CONSTRUCTION ACTIVITIES

- piping fabrication and installation with relevant hydrotest & precommissioning
- coordination of painting, insulation and NDE/PWHT
- piping supports supply & installation
- steam tracing installation
- fabrication and erection of steel structures
- skids pre assembly and relevant installation on site
- heaters & Steam reformers installation

EQUIPMENT & MODULAR PLANTS

- **erection of Static and Rotating Equipment**
- **assembly of modular plants**

SHUTDOWNS – HOT & COLD WORKS

- **revamping of equipment (vessels, heat exchanger, filters etc.)**
- **replacement of internals (columns and reactors)**
- **replacement of valves**
- **piping dismantling and installation, tie ins**
- **retubing of heaters (incl. refractory works)**

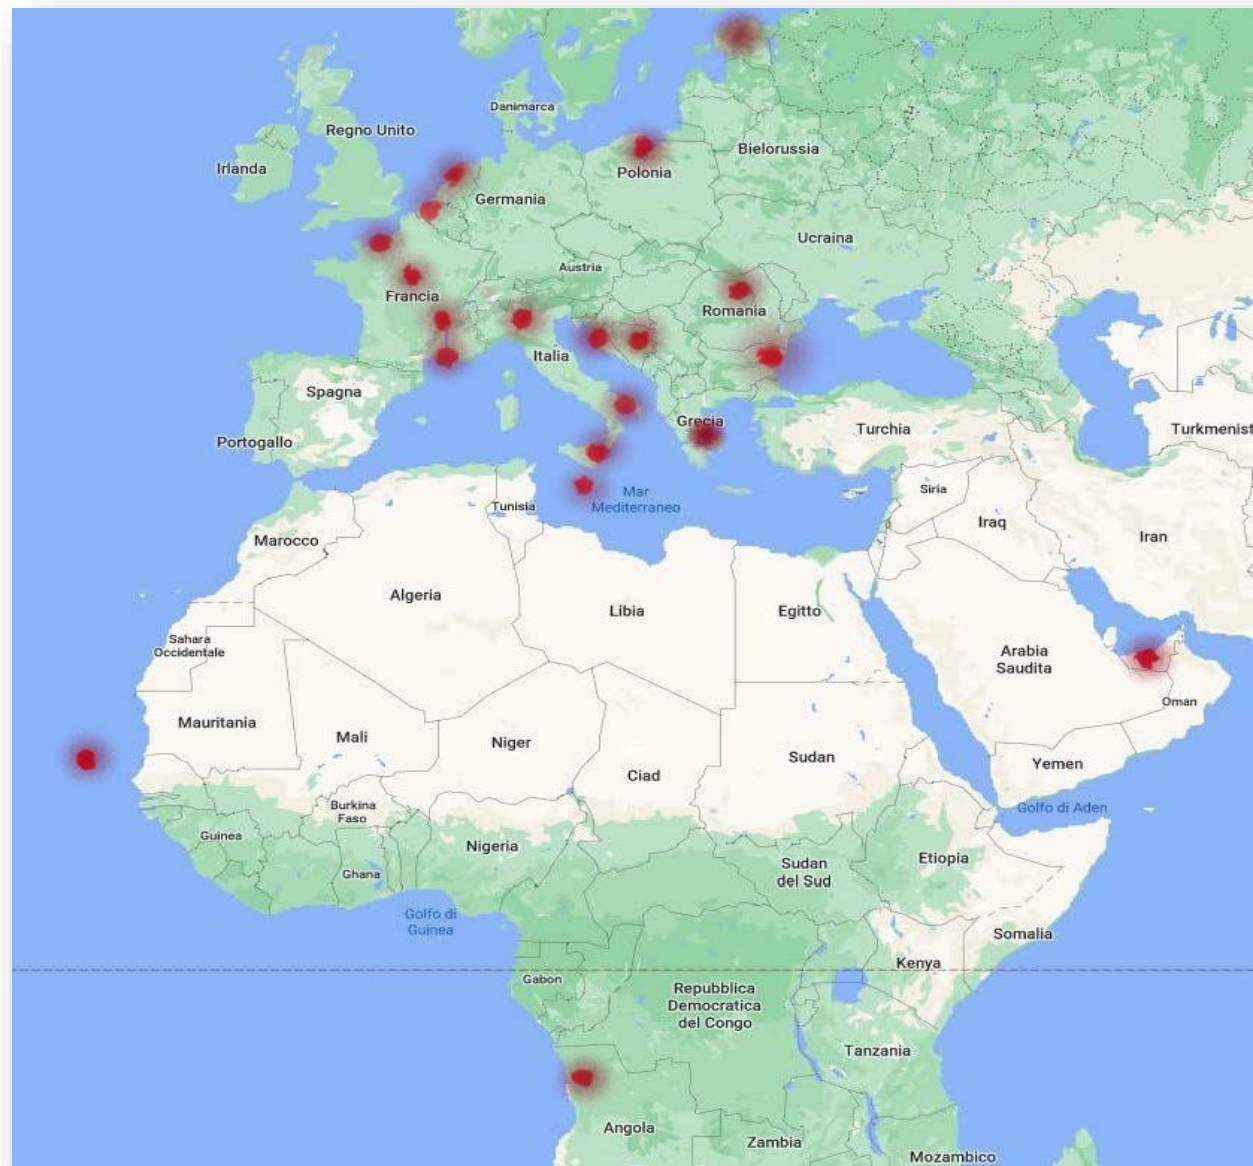

PROJECT & CONSTRUCTION MANAGEMENT SERVICES

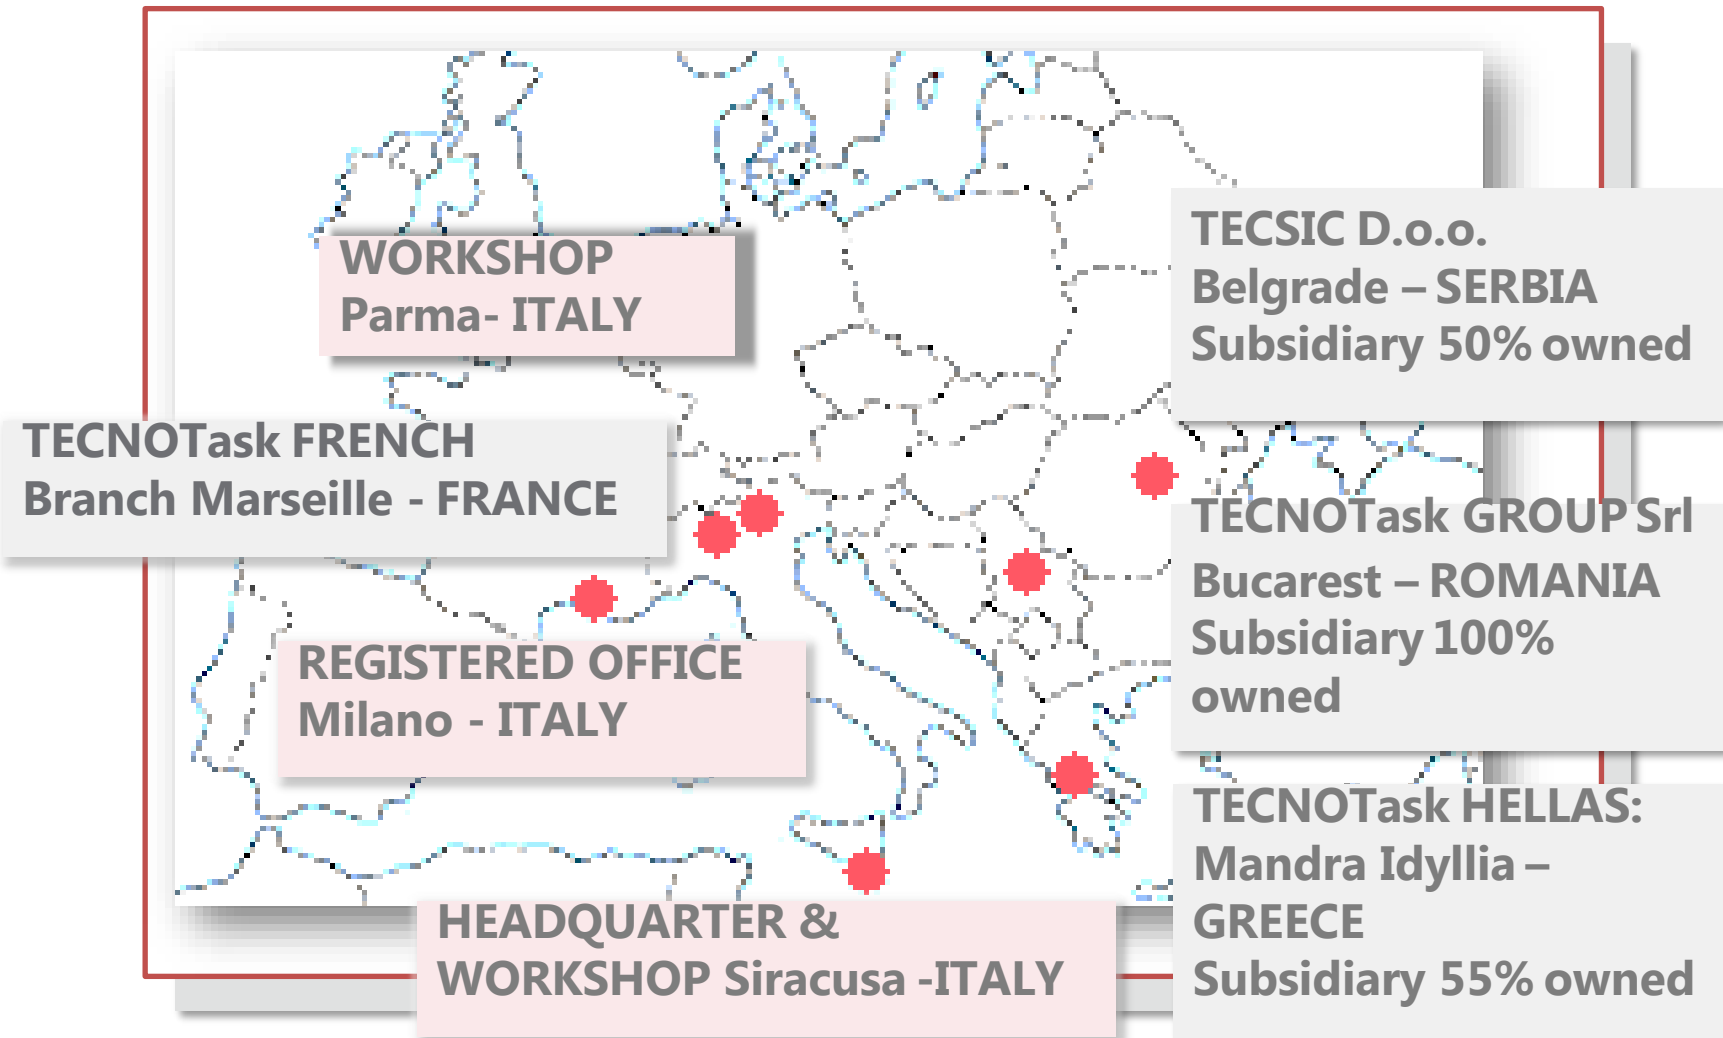

- **planning & progress monitoring**
- **budgeting and cost control**
- **risk identification and mitigation**
- **contract & subcontract administration**
- **changes and claims management**
- **multidisciplinary site work supervision**
- **quality control activities**

WHERE WE **WORKED**

OUR COMPANIES **IN EUROPE**

FACILITIES: **OPERATIVE OFFICE & WORKSHOPS**

head quarter with fully equipped workshops and owned yard, TECNOTask can satisfy major project requirements in term of fabrication works

reliable painting & NDE subcontractors, dully managed and coordinated by TECNOTask fabrication teams, grant top quality products

head quarter with workshops:

- 500 sqm of offices
- 20.000 sqm of laydown area
- 2.500 sqm of equipped workshop

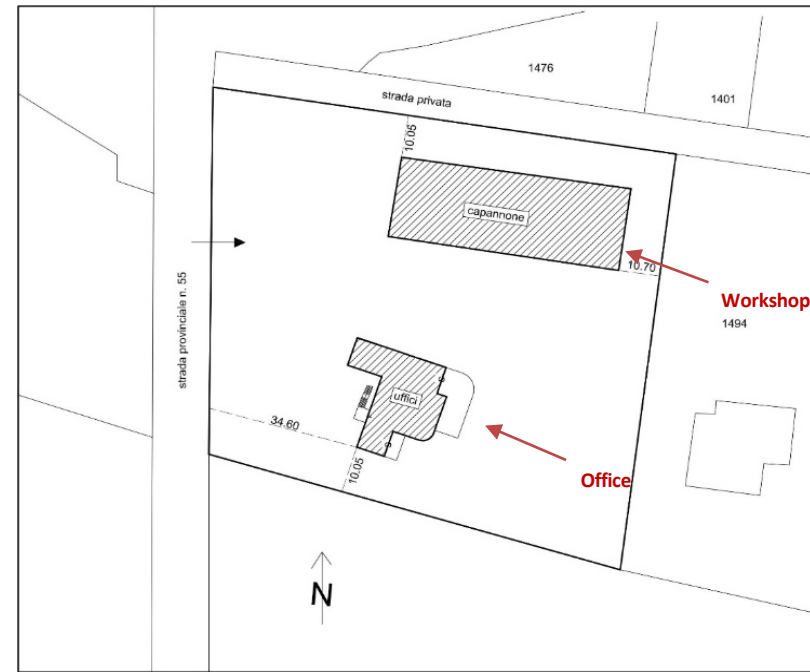

FACILITIES: OPERATIVE OFFICE & WORKSHOPS (Siracusa, Italy)

Offices

- **TECNOTask can satisfy special material requisition with 115 qualified procedures**
- **Welding Procedure qualification both in ASME IX and EN 15614 level2, manual, tig(141), semi-automatic (136) and electrode (111) process**
 - **All types of carbon steel**
 - **Low alloy steels**
 - **9Cr steels (P91-P92)**
 - **All Austenitic (304-316-321-347)**
 - **Nichel alloy**

ONGOING MAIN PROJECTS

project: Galaxie Biojet Project
location: Grand Puits, France

contractor:
final client: 
TotalEnergies

- Construction of a Biodiesel plant with a new biological oils pre-treatment unit and the revamp of already existing hydro-treating and hydro-cracking units of the existing platform in Grandpuits
- Installation of new equipment
- Prefabrication and installation of new piping – 48.000"
- Revamping with adaptation of Existing equipment - 88 tons

Contract value: 24.8 MEur

project:

T/A 25 Metal trade

location:

Augusta, Italy

**contractor and
final client:**

- Pipe prefabrication and installation
- Pipe dismantling
- Carpentry construction and assembly
- Heat exchanger maintenance
- Heat treatments
- CND
- Furnace and heater maintenance

Contract value:

project: Mechanical Maintenance Frame Agreement
location: Priolo G. Italy
contractor & final client

TECNO Task in the leader of a multidisciplinary JV for a 3 years (+2 optional years) frame agreement

- MAINTENANCE OF EXCHANGERS
- VESSELS
- TANKS
- AIR COOLERS
- COLOUMNS
- HEATERS
- VALVES
- PIPING WORKS

Expected final contract value: 8 MEur

project: HRSG 800 MW & BOP Lot. 1
location: Tavazzano Italy
contractor: 
final client:  PRODUZIONE

BOP:

- 500 T of piping
- 90 T of piping supports
- 200 T Equipment
- Painting & Insulation
- GRP piping installation

HRSG:

- 700 T of casing + 192 T of ducts + 543 T of secondary structures
- 173 T of static eqpt + 744 T of penthouse + 380 T of stack
- 3840 T of heating surfaces + 507 T of internal & external piping + 90 T of valves
- Painting & Insulation
- E&I

Expected final contract value JV: 31 MEur

project: Expansion of Catania plant to produce Doramectin 8 Tons

location: Catania, Italy

contractor:

final client: *zoetis*

- Pharmaceutical plant
 - Installation of lines in black material CS/316L and clean one.
 - Welding process with orbital welders
 - Piping support installation and equipment installation
- Project within 2 buildings: DSP and USP

Contract value: 6.5 MEur

project:

location:

**contractor and
final client:**

TAR PLANT MECHANICAL ASSEMBLIES

Priolo, Italy

versalis

CHEMISTRY BY PEOPLE FOR PEOPLE

- **Mechanical assembly and piping**
- **installation of a Wastewater Treatment Plant to be built at the Versalis plant in Priolo Gargallo (SR).**

MAINTENANCE & SHUT DOWN

Main Projects overview

Maintenance & Shut down experiences

PRE SHUT DOWN PHASE:

- job analysis with job cards preparation
- coordination of scaffolding installation
- piping fabrication
- shut down material preparation

SHUT DOWN PHASE:

- maintenance of heaters
- maintenance of equipment
- activities in confined spaces
- piping dismantling, installation & TIE INS

client: 
year: 2022
place: TURBIGO (MI) (ITALY)

involved plants: IREN thermal power plant
executed works: tie-ins
(new plant with old lines)
piping,
steel structures and supports dismantling
maintenance works: filters, valves,
machineries, tightening

client:

year: 2021

lace: VERSALIS BRINDISI (ITALY)

involved plants:

P1CR Plant –F1001 F/I Furnaces

executed works: revamping works

- demolition
- piping
- furnace Steel
- E&I and insulation installation works

client:

year: 2021

place: PRIOLO GARGALLO (ITALY)

involved plants:

ethylene plant unit B1007

executed works:

ordinary maintenance

client:

ISAB

LUKOIL

year:

2020

place:

PRIOLO GARGALLO (ITALY)

involved plants:

plant 101 Units 300-800-1600

executed works: replacement of radiant section
and convective from P9 to P91;
replacement of catalytic piping in manaurite,
replacement of inlet and outlet
pig tails in alloy 800 and P11

client:

year: 2019-2020

place: PRIOLO GARGALLO (ITALY)

involved plants: aromatic units

executed works:

maintenance of 116 exchangers

35 vessels

2 tanks

12 air coolers

21 coloums

3 heaters

1.314 valves

19.000 inches of piping work

390 tie ins

client:

year: 2019-2020

place: RIJEKA (CROATIA)

involved plant: hydrocracking

executed works:

purchase of project materials,
coils fabrication, radiant & convection sections
retubing, refractory & E&I works

client:

year: 2019

place: LE HAVRE - FRANCE

involved plants: DG03-D11

executed works:

pipings fabrication and erection,
711 tie ins, steam tracing, supports installation

client:

year: 2019

place: MILAZZO (ITALY)

involved plants:

gas concentration - topping

executed works:

3.800 inches of piping works

140 tie ins, N° 4 columns

Internal replacement

client:

ISAB

LUKOIL

year: 2020

place: PRIOLO GARGALLO (ITALY)

involved Plants: HYDROGEN – HYDRO TREATING

executed works: PARTIAL RETUBING OF 2 HEATERS

client:

clients: 2018-2019

place: RIJEKA (CROATIA)

involved plant: topping unit

executed work:

new pre heating system installation

heater retubing (radiant & convection

sections) refractory & E&I works, inlet system

client:

year: 2018-2019

place: RIJEKA (CROATIA)

involved Plant: hydrocracking

executed work: reactor internal replacement

client:

ISAB

LUKOIL

year: 2018

place: PRIOLO GARGALLO (ITALY)

involved plants: cumene, alkylation units,
MTBA, topping, distillation, gas concentration

executed works:

revamping of 53 exchangers,
39 vessels, 12 filter, 24 air coolers,
13 columns, 1 heater
15.000 inches of piping works
380 tie ins
replacement of 600 valves

client:  **OMV Petrom**
year: 2018
place: PLOIESTI (ROMANIA)

involved Plant: topping

executed works:

heaters retubing (radiant & convection sections)

client:

year: 2018

ISAB

LUKOIL

place: PRIOLO GARGALLO (ITALY)

involved plants: vacuum

executed works: radiant section retubing of 1 heater

Subject: Letter of Reference – H-321 TOPPING HEATER REVAMPING– TURNAROUND
2019 – RIJEKA (HR)

TECNOTASK SpA was awarded for the execution of Turnaround activities (Topping Heater Revamping TOPPING 3) in INA Refinery in RIJEKA, Croatia.

Despite the difficulties of the Project, TECNOTASK responded quickly and positively to the Project scope requirement showing a wide and deep technical knowledge and a proactive aptitude.

TECNOTASK has supported the project increasing the manpower when required, finding technical solutions and collaborating with our team.

The flexibility demonstrated by your Company has been invaluable to the Project.

Works were executed in the Schedule time, with efficient organization fulfilling highest quality and safety behavior.

We would therefore have no hesitation recommending TECNOTASK as a reliable and professional Contractor in mechanical activities.

Project Manager.

Subject : Letter of Reference – 376-H-002 HCU HEATER REVAMPING-2020- RIJEKA (HR)

TECNOTask SpA was awarded as EPC Contractor for the execution of 376-H-002 heater revamping in INA Rijeka Refinery, Croatia.

TECNOTask as a EPC Contractor has made a good challenge according the Project Requirement have been achieved successfully due to the good practice showed during the development of the Engineering, Procurement phase and Construction phase.

376-H-002 furnace was a strategic project for INA due to fact that the operation of all refinery was depending on this project due to which very tight and demanding timeframe was available for work execution, according to this needs TECNOtask SpA understood very well INA strategic goal and complete management of TECNOtask SpA acted as a partner of the project, they supported the Project in all aspects, finding technical solution through collaboration with INA Team

The flexibility demonstrated by Your Company has been invaluable to the Project Works were executed in the schedule time, with efficient organization fulfilling highest quality and safety behavior

We would therefore have no hesitation recommending TECNOTask as a reliable and professional Contractor in EPC activities and mechanical activities.

Milano, 1 Settembre 2014

LETTERA DI RIFERENZE

Con la presente si vuole attestare il buon lavoro svolto dal Vostro team per la preparazione della fermata dell'impianto "MTBE" c/o lo stabilimento VERSALIS di Ravenna.

Quest'attività si è svolta da gennaio a luglio 2014. Durante tale periodo il team integrato di progetto ha eseguito le seguenti attività:

- Identificazione delle quantità di tubazioni installabili in pre-fermata ed in fermata;
- Identificazione delle linee da smantellare
- Preparazione dei test packs per collaudi
- Verifica dello stato delle tubazioni prefabbricate dal subappaltatore meccanico
- Verifica dei dossiers di prefabbricazione e dei dossiers di montaggio apparecchiature
- Preparazione del cronoprogramma esecutivo con individuazione delle sequenze logiche
- Calcolo delle quantità di progetto

SIMECO attesta che il lavoro svolto dai tecnici di TECNOTask integrati nel nostro staff di progetto è stato molto apprezzato anche dal Cliente finale.

TECNOTask è da considerare un partner serio e affidabile per la gestione parziale o globale di progetti.

Distinti saluti.
